NO. 617-VI

**An appeal by the Osh City Regional Council to the Verkhovna Rada and the
Cabinet of Ministers of Ukraine for the further development of the
infrastructure of Osh City. Zmiyinni and the village of Bile in the Kiliya
district of Odessa oblast**

Zmijinyi Island is located in the northeastern-western part of the Black Sea, occupying a favourable geographical and strategic position and of great importance for our country.

Today the administrative and territorial unit - the village of Bile Vilnivka of the Vilnivska city council of the Kiliya district of the Odessa region is located here. More than 30 people permanently reside on the island and support the activities of representatives of state institutions and agencies and maintain 58 items of state property.

The concept of social and economic development of the island. Zmiany is based on the state's commitment to ensure the island's territorial activity , strengthen the protection and development of the marine economic zone of Ukraine, develop the scientific, historical, economic and tourist potential of the islandTo fulfill these tasks the Decree of the Cabinet of Ministers of Ukraine from January31 of 20092002 # approved713 the Complex program of further development of the infrastructure and implementation ofthe business activity on the island. Zmiyinni and the continental shelf for the period 2002-2006, which was prolonged1807 till March31, 2011 by the Resolution of the Cabinet of Ministers of Ukraine from March 27, 2006 No.

Over the years, the programme has been able to implement a significant number of activities to improve the living conditions of the population.

Since the beginning of the year2009, the State Budget of Ukraine has not provided earmarked funding for the completion of important activities for the island's livelihood, such as coastal reinforcement and infrastructure construction in the village of Bile.

The lack of capital funding in 2009-2012 hindered implementation of basic environmental protection measures to protect the island from natural erosion, jeopardized the preservation of its integrity and led to the termination of the construction of the facilities. Incomplete construction sites are rapidly being demolished due to the harsh

climatic conditions. All of the unfinished construction sites on Zmijinyj require completion at the earliest possible date. In the absence of further financing, the cost of previously allocated funds for the construction and maintenance of the assets on Zmijinyj will be lost.

Taking into account the global trend of shifting the focus of hydrocarbon production from the continental territory to the sea and ocean shelf, the overall importance of the island will continue to grow. The importance of Zmijiny will grow, so special attention should be paid to its further development.

The development of the island. The development of Zmiany requires the consolidation of efforts of the state and the region to solve problems related to the development of a Ukrainian outpost in the eastern part of the country.

These measures can be implemented only if the Comprehensive Programme for the Further Development of Infrastructure and Business Activities on the Island of Zmiany and the Continental Shelf is extended until one year 2017 or a new state programme is developed, which must be financed by the State Budget of Ukraine.

Moreover, in order to solve these problems, there is a general need to define at the legislative level a special legal status for the village of Bile, including the establishment of a special procedure for its financing.
