

Jadedanlop Exposal

Grooming, sending explicit photos, encouraging nude sending.

Written by: Slosh and Awake

If you guys don't know who Jadedanlop is, she makes levels in Geometry Dash such as World Wide Panic, 8 star world, Lap Two as well as many others. She has gained a fanbase of her own through both GD and through short-form content on YouTube, TikTok and more.

Back in late October to early November, Jadedanlop was sending explicit photos to a minor 3 years younger on Discord. Jade was 16 and turned 17 (Jade's birthday is November 10th) during this time and the minor was 14. Jade would ask for explicit images frequently and would attempt to cover up anything after the images were sent, deleting them immediately after saving them. She has also admitted to exchanging explicit photos to others in the past. These actions are illegal.

The minor would look up to Jadedanlop as a creator. Once she had met her, Jade immediately started acting flirtatious towards them, saying sexual/affectionate comments towards them.

Actto, or actodrik, another Geometry Dash creator is also involved in this, as they encouraged the idea of exchanging these photos, as well as being responsible for sending their own nudes without any permission from the receiving end and distributing the 14-year-old's nudes to other people without consent.

The following screenshots contain interactions between Jade and the minor from October 28, 2025 - December 15, 2025, which contains multiple conversations. All the nudes have been deleted since, but there are still disgusting messages being sent here.

Although the minor is seen asking to send nudes and has sent them, they clearly show uncertainty early into the conversation about being scared if caught, and legal issues. Jade constantly persuades them, telling them that it is fine because they are both minors, and promising that the nudes will be deleted. Jade is CLEARLY trying to get nudes out of them.

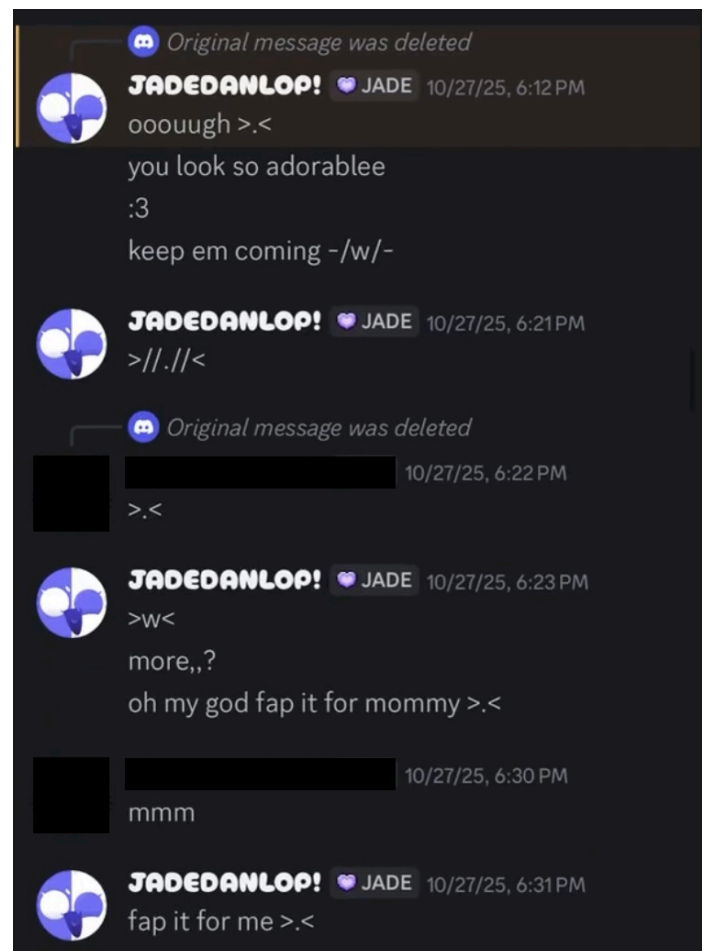

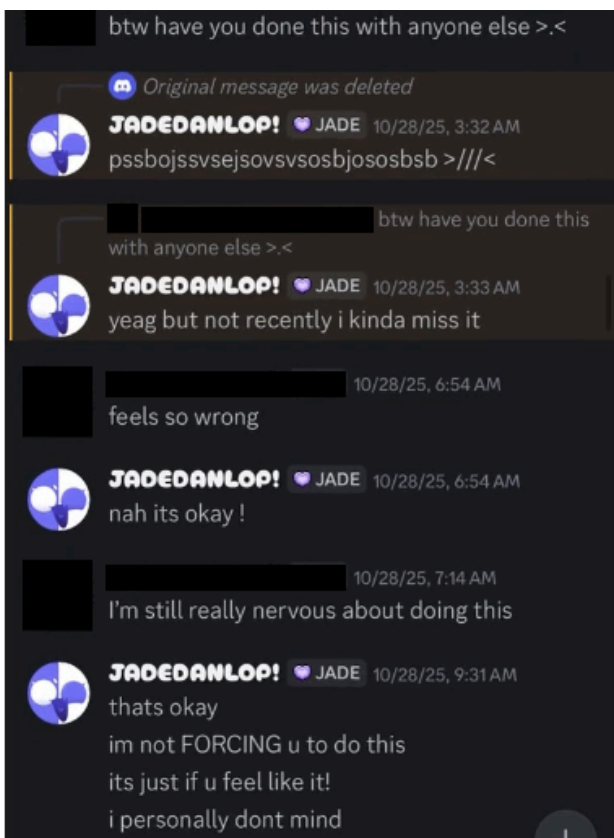

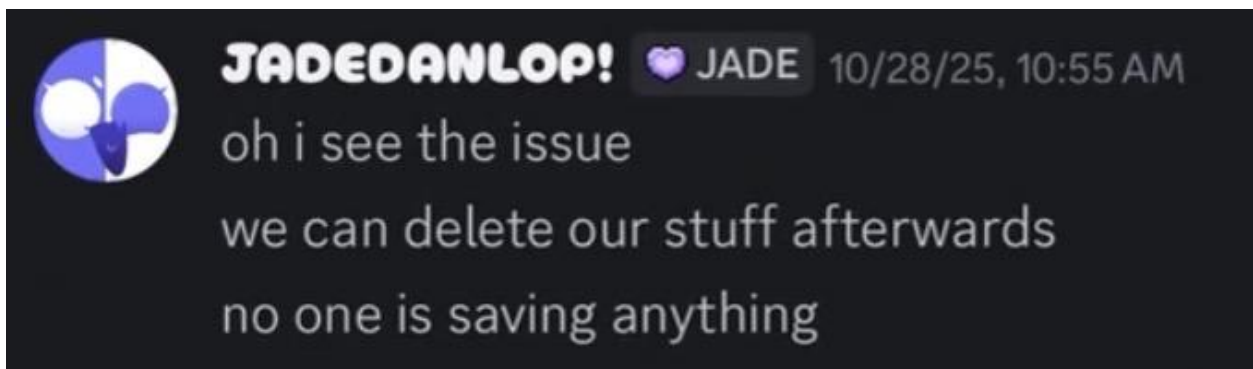

She is taking advantage of a person who is going through puberty and is horny and giving them a fake sense of safety in order to exchange nudes with them. Jade has also stated in these screenshots that she has done this before with other people and "misses it" which means this is not her first time doing such. Jadedanlop is a groomer and a manipulator. She is denying her actions and trying to defend herself when she is clearly in the wrong.

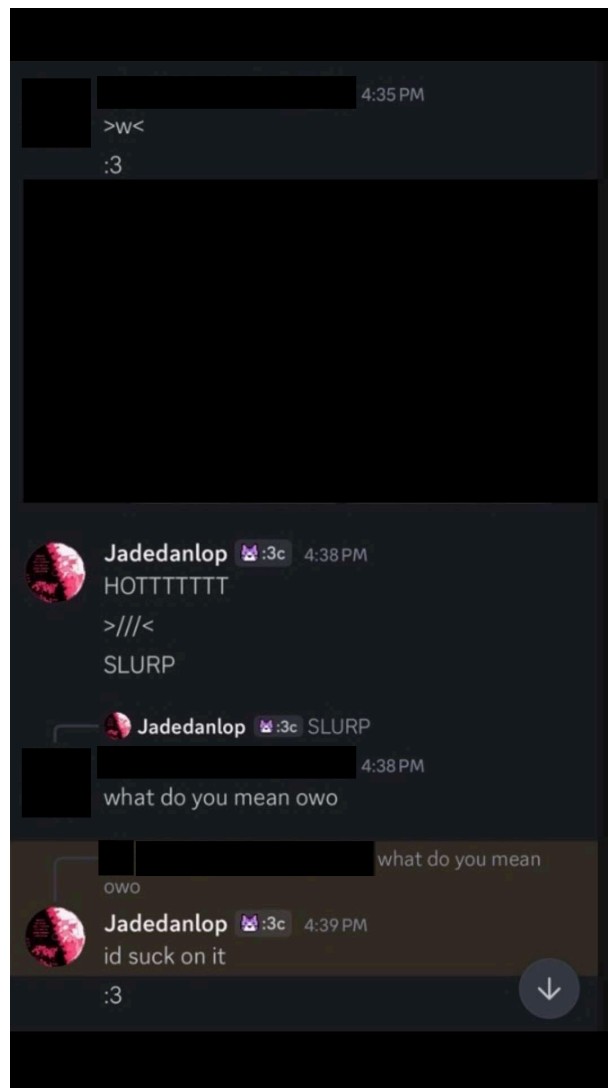

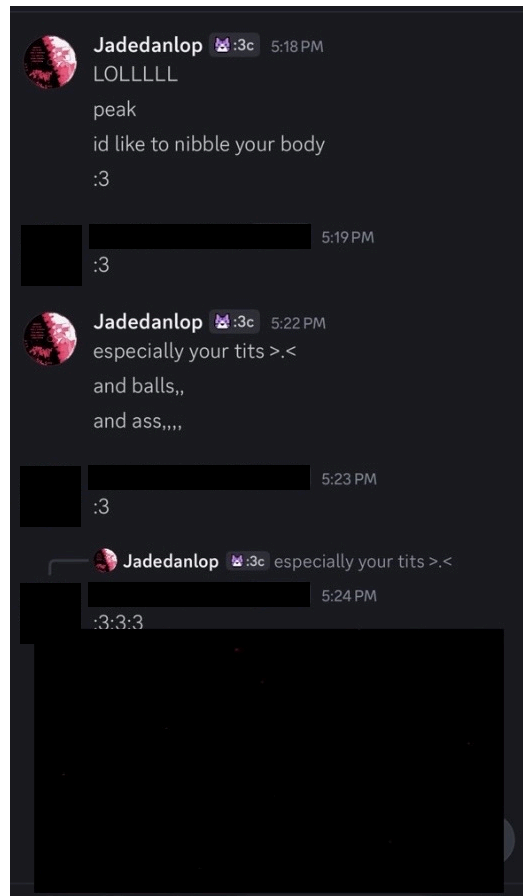

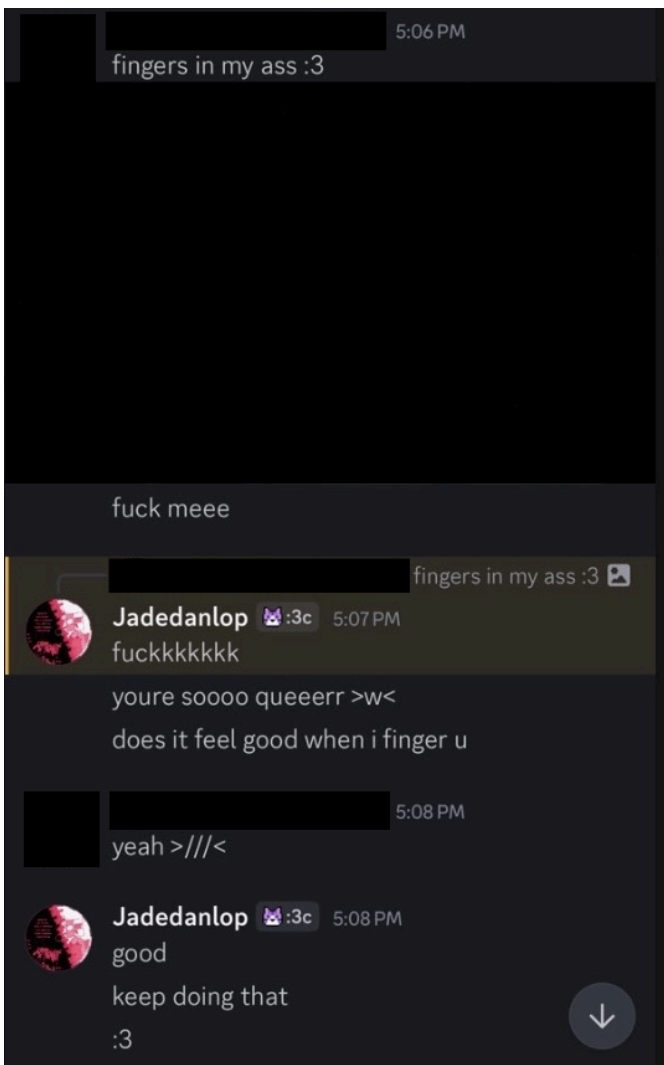

I've heard other people say that Jade stopped being flirtatious with them the day she turned 17, November 10th, (which doesn't make anything better as the nude exchanging, grooming, and distribution is still illegal), but you can see the dates in the screenshots and you can see even after Jade turned 17 that she was still saying disgusting sexual things.

I urge the Geometry Dash community to do what should really be done with this information. Make the right choice for the sake of our community, and don't let any bad people walk around freely. Let them know they are not welcome.

The following screenshots have censored the explicit photos and the 14 year old name to protect their privacy.
