

Hey, Lisa

I want to proactively discuss voter and circulator protection for the 2026 initiative.

In my prior advocacy efforts, supporters were targeted by an out-of-state harassment forum that engages in doxxing and intimidation. As you can imagine, this can chill civic participation, so I wanted to understand what safeguards already exist and what best practices the county recommends to prevent anybody in Lincoln from being discouraged from supporting the brothel initiative.

Specifically, I'd appreciate guidance on records-request handling, redaction discretion, and the appropriate protocol, if voters report harassment connected to their participation. I do know that users on this site might email you and ask for electronic copies of anything related to this initiative.

I just wanted to let you know those people might try putting the affidavits and the petition sheets on that site. So if the law permits, definitely use discretion.

My goal is to ensure the process remains transparent, lawful, and safe for everyone involved.

Thank you for your time and guidance.

Happy new year.

Russell
